SUMMARY

Data science trainee skilled in **Python**, **SQL**, and **data visualization tools** (Tableau, Power BI). Experienced in applying **machine learning** and **deep learning** techniques to solve real-world problems. Adept at **teamwork** and **strategic thinking**, delivering impactful, data-driven solutions.

EDUCATION

B.K. Birla Institute of Engineering and Technology, Pilani

B.Tech in Computer Science and Engineering (Data Science)

Sept 2021 – Aug 2025 | CGPA: 7.95/10

Saraswati Vidhya Peeth SR SEC School, Sikar

Class 12 (PCBM)

Mar 2020 – Mar 2021 | Percentage: 91%

Lords International School, Rajgarh

Class 10

Mar 2018 – Mar 2019 | Percentage: 73.1%

EXPERIENCE

Upflairs Pvt Ltd, Jaipur

Data Science Intern | June 2024 – August 2024

- Developed and implemented **machine learning** and **deep learning models**, improving predictive accuracy for real-world applications.
- Enhanced **team collaboration** and **communication** while tackling data-driven projects, contributing to improved operational efficiency.

CERTIFICATION

Machine Learning A-Z (Udemy) | June 2023 – June 2024
100 Days of Code: The Complete Python Pro Bootcamp (Udemy) | Jan 2023 – June 2023

SKILLS

Programming Languages: Python, Machine Learning, Deep Learning, NLP, Algorithms

Databases: MySQL, MongoDB

Data Visualization Tools: Tableau, Power BI

Web Development: Flask

Soft Skills: Problem-solving, Communication, Team Collaboration, Critical Thinking

PROJECTS

Movie Recommendation System :-

Developed a movie recommender leveraging **collaborative and content-based filtering**, with a **Streamlit** interface for tailored suggestions.

[\(GitHub Repository\)](#)

Tools & Technologies: Python, Streamlit, Kaggle, VS Code, GitHub.

Crop Classification Model :-

Built a classification model to predict crop suitability based on environmental and agricultural data, leveraging **feature selection** and **preprocessing techniques**. [\(GitHub Repository\)](#)

Tools & Technologies: Python, Pandas, Scikit-learn, Kaggle, Jupyter Notebook.

Email Spam or Ham Classifier :-

Implemented an **NLP-based model** to classify emails as spam or ham, achieving high accuracy through advanced **feature engineering**. [\(GitHub Repository\)](#)

Tools & Technologies: Python, NLTK, Scikit-learn, VS Code, GitHub

Credit Card Financial Dashboard :-

Designed an interactive **dashboard** to monitor key metrics, enhancing decision-making with advanced **data visualization techniques**. [\(GitHub Repository\)](#)

Tools & Technologies: Power BI, SQL, Python, Tableau, Excel

Flask To-Do Application :-

Developed a user-friendly **To-Do web application** using Flask, enabling users to create, update, and delete tasks seamlessly. Integrated a **SQLite database** for efficient task management and implemented responsive front-end design for an engaging user experience. [\(GitHub Repository\)](#)

Tools & Technologies: Flask, Python, HTML, CSS, SQLite, VS Code, GitHub
